SHEET METAL CNC PUNCHING

Kurz sheet metalwork's CNC punching service offers a cost-effective precision profiling solution – with rapid processing speeds and lower operating costs than laser cutting.

Sheet metal profiling

Punching sheet metal potentially is a faster and cheaper method than laser cutting, depending on part complexity and batch size. Simpler profiles and larger volumes are ideally suited to punching.

CNC punching capacity

Kurz has two automated CNC punching machines with max sheet size of 3000mm x 1500mm and and capable of punching materials (metal and plastic) at thicknesses up to 10mm.

CNC SHEET METAL FOLDING AND BENDING

Kurz sheet metalwork has a full range of precision metal forming facilities.

Full range of precision metal forming facilities

Kurz has two Amada pressbrakes in equipment – capable of bending up to three metre length and up to 10mm in steel, stainless steel, and aluminium, and this is used for folding precision sheet metal components.

CUSTOM PRECISION METAL FABRICATION AND WELDED PRODUCTS

Kurz sheet metalworking provides welding for steel components and custom precision metal fabrication

Kurz offers MIG/MAG and TIG welding as part of its precision metal fabrication service.

Kurz is certificated to provide welded steel structure elements for load bearing applications with execution class up to EXC2 according to the EN 1090-1 certificate.

SANDBLASTING SERVICES

Sandblasting of surfaces is one of the most efficient ways of removing contaminants and preparing products for further treatment.

This technology is effective for removing traces of corrosion, bitumen, fuels and lubricants, carbon and limescale deposits, cement mortar, lacquer and paint.

We are able to process oversized steel and wood parts and constructions in up to 15 meters length.

POWDER PAINTING

Our company offers a powder painting service.

This produces a glossy or matte finish for any metal detail in the required colour.

The advantages in powder painting include greater levels of resistance to environmental effects, scratches, corrosion, and chemical and mechanical damage.

We have a powder coating camera of 1,6 meters high, 1,9 meters wide and 6,5 meters long in our equipment. We can provide up to corrosivity class C3 protection according to EN ISO 12944 standard.
