Sandblasting

Sandblasting of surfaces is one of the most efficient ways of removing contaminants and preparing products for further treatment. We are able to process oversized steel and wood parts and constructions in up to 15 meters length.

Powder coating

Powder coating technology produces a glossy or matte finish for any metal detail in the required colour. We have a powder coating camera of 6,5 meters long, 1,9 meters wide and 1,6 meters high in our equipment. We can provide up to corrosivity class C3 protection according to EN ISO 12944 standard.
